*courses yet to be completed

PROJECTS

Chatbot (pranavai.ccbp.tech)

Developed a mini Chatbot Application which initially wishes user and responds to user if user input matches to list of answers that chat bot maintains

- Displayed conversation between user and chatbot using HTML list elements , styled using CSS, Bootstrap.
- Displayed user input message using HTML form input element and reply from the chatbot dynamically in the UI by using JavaScript DOM Operations and Array push method. Implemented response from Chatbot by using Array filter method.

Technologies used: HTML, CSS, JS, Bootstrap

Cricket Team Application (pranav1.ccbp.tech)

This application is a cricket team management system that allows users to manage the players for a cricket team. It was developed using Java, Spring Boot, JDBC, JPA, Hibernate, and SQL.

- Developed a RESTful API using Spring Boot, JDBC, JPA, and Hibernate for handling CRUD operations for players and matches. Implemented functionality to allow users to add new players, update player information, and delete players from the team.
- Added features to manage the schedule of matches, including updating match details and recording match results.
- Optimised the database queries and improved the performance of the application using SQL.
- Tested the RESTful API endpoints using Postman.

Technologies used: Java, Spring Boot, JDBC, JPA, Hibernate, SQL.

Popular Podcasts (Podcasts Page) (pranav23.ccbp.tech)

Developed an online platform for users to browse a variety of podcasts, including speaker names and episode listings.

- Constructed banner sections and project cards using various HTML block and inline elements.
- Implemented CSS3 properties like background, flex, and box model properties, in addition to relative and absolute units for visual design.

Technologies used: HTML, CSS, Bootstrap

CERTIFICATES

Build an App in Android Studio using Static Files
